C-2100 Ultra Zoom
● Quick-Start Guide ●

OLYMPUS®

Thank you for purchasing the Olympus C-2100 Ultra Zoom.
This Quick-Start Guide has been designed for those who want to become familiar with the C-2100 Ultra Zoom in a very short time. The "Names of parts" section is especially helpful for identifying parts easily without having to read through the complete Instruction manual.
For detailed operations, please refer to the complete Instruction manual.

## 1 Getting Ready...

Loading the batteries

1. Follow the procedure below.

| Slide the battery compartment lock toward ⏩.	Open the battery compartment cover.	Load the batteries.	Close the battery compartment cover.	Slide the battery compartment lock toward ⏪.
		Lithium battery packs (provided) / AA batteries		

★ Close the battery compartment cover while pressing the batteries with the cover.
★ Zinc-carbon batteries cannot be used.

2. Inserting a SmartMedia card.
  * Before inserting, check that the Power switch is off and there are no images on the Viewfinder/Monitor.
  Open the Card cover and push in the card* as shown below.
 (*The pictures you take will be stored in the card.)

  Open the Card cover.   Push the card in and close the Card cover.

3. Turn on the camera.
  Set the Power switch to ON.

  Power switch

You can select camera functions using the Mode dial. You will probably want to try the Program mode first, which lets you take properly-exposed pictures by simply pressing the Shutter button.

Mode dial

[Still picture recording mode]
P: Simply press the Shutter button to take a picture.
A: Set the desired aperture manually.
S: Set the desired shutter speed manually.
M: Set the desired aperture and shutter speed manually.
S-Prog: Take pictures under a variety of conditions. (Portrait/ Sports/Landscape/Night Scene)
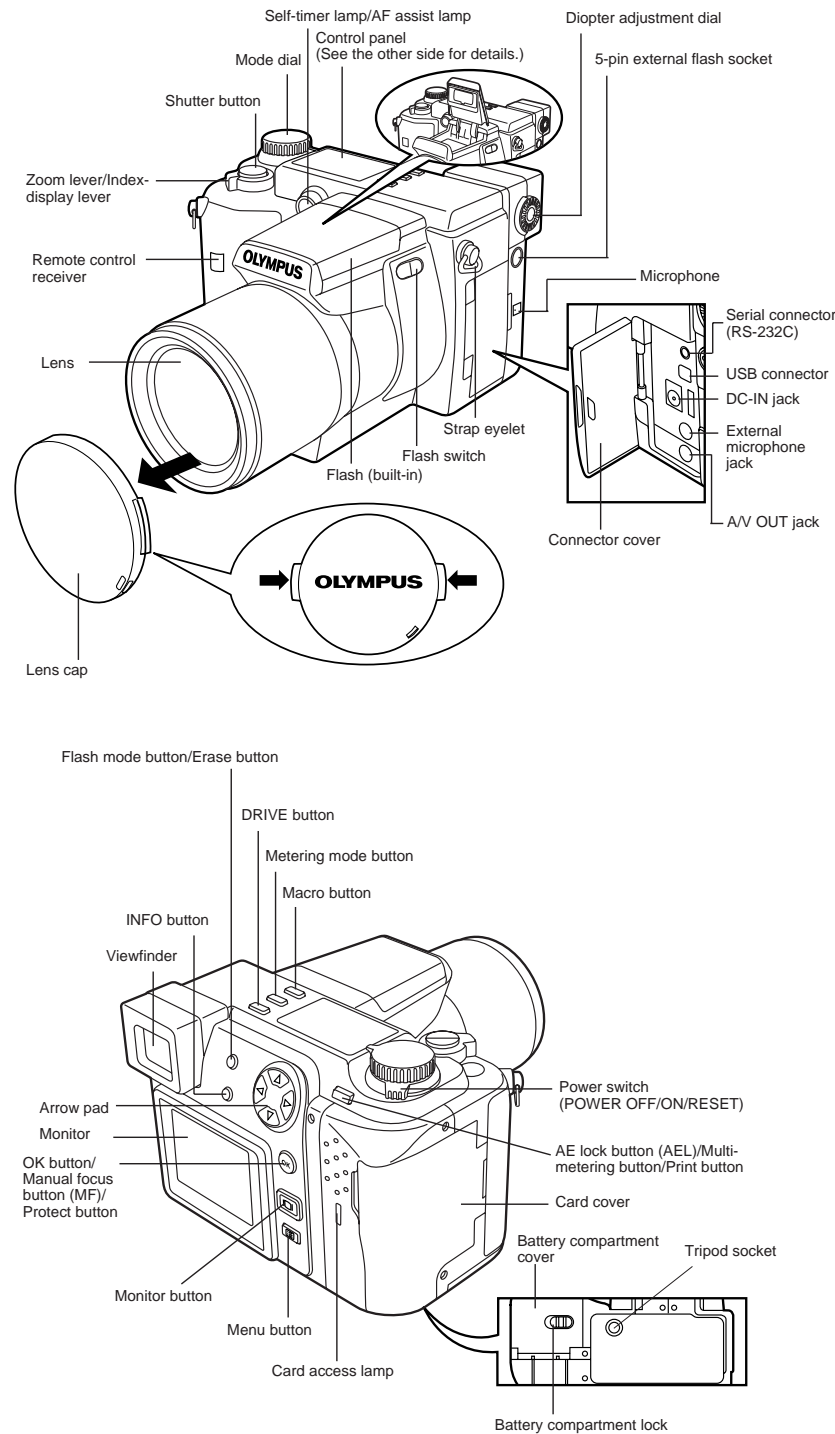

[Movie recording mode]
🎥 :   Records movies.

② Taking pictures

Taking still pictures

1. Set the Mode dial to P.

2. Compose the picture by turning the camera towards the subject and adjusting the AF target mark until you can see it clearly in the Viewfinder.

   Press ▢ to select whether to display your image on the Monitor or the Viewfinder.

Viewfinder
P F2.8 1/30 0.0

AF target mark

[To enlarge your subject]
Press the Zoom lever toward "T" to enlarge your subject. To return to normal magnification, press the Zoom lever back toward "W".

3. Press the Shutter button halfway to focus.

   The AF confirmation mark lights up in green in the upper left corner and the camera beeps. Focus and exposure (shutter speed/aperture) become locked.
   If the AF confirmation mark blinks, then the camera is out of focus. If this happens, release the Shutter button and move the camera slightly until you see the AF target mark clearly. Then, press the shutter button halfway again.

Press halfway   Press fully

○ P F2.8 1/800 0.0

AF target mark

4. Press the Shutter button fully to take a picture.
   The camera beeps when the shutter is released.

   The free part of the memory gauge lights up and the card access lamp blinks while the picture is being recorded.
   Continuous shooting is available even if the card access lamp is blinking, unless the entire memory gauge is lit.
   If you are taking a picture in a dark environment, the built-in flash will fire automatically if it has been popped up.

⑤ Turning off the power

When you are finished using the camera, turn the power off after checking that the card access lamp is not on.

● The picture on the screen will disappear when you turn the power off.
● If no operation is performed for 1 minute or more, the image on the screen goes off automatically to avoid battery exhaustion (this function is called Sleep). To end Sleep, perform any operation on your camera.
● When you store the camera, make sure to put the lens cap on.
